

OrganoTex®

ShoeCare Waterproofing

300 ml, Article No. 103103, EAN code 7350064221198

- 🌿 **Shoe impregnation spray for all types of materials**
- 🌿 **Maintains the material's breathability**
- 🌿 **PFAS-free and readily biodegradable**
- 🌿 **Swedish innovation, made in Sweden**

Universal waterproofing that effectively protects your shoes and boots against rain and dirt. Maintains the material's breathability and extends its useful life. The formulation contains natural fatty acids that bind deep down (non-film forming) and create water repellency. The unique technology allows for full preservation of the textile's feel, colour and breathability.

Suitable for all types of textiles, nubuck, suede, and leather. The product is sprayed directly onto cleaned shoes/boots and works even if they are not completely dry.

The product is PFAS-free and readily biodegradable (according to OECD301A), so nothing remains left in nature. The patented technology is inspired by nature's own chemistry, as in the highly water-repellent properties of the lotus leaf. OrganoTex is developed and manufactured in Sweden by greentech company OrganoClick.

When is it time to reproof?

Once the water no longer beads off your shoes or boots, it's time to reactivate the factory-applied treatment, termed DWR*. By cleaning and reproofing your footwear regularly, you keep its function and extend its useful life.

*The factory-applied treatment of an outer fabric is often called DWR, which stands for Durable Water Repellent.

HOW TO USE:

- 1) Clean the shoe.
- 2) Shake the bottle.
- 3) Protect the work surface and spray the shoe surface evenly.
- 4) Wipe off any excess liquid that might cause stains.
- 5) Allow to dry for 24 hours to achieve the full effect.

OrganoTex®

CONTENTS

Water, organic silicon polymers, beeswax, and natural fatty acids.

VOLUME	300 ml.
SHELF LIFE	24 months, opened packaging
RECYCLING	Sorted as plastic (rPET bottle)
STORAGE	Frost-free, out of reach of children
MANUFACTURER	OrganoClick AB, www.organoclick.com
CONTACT	organotex@organoclick.com

MADE GREEN INSIDE by OrganoClick

Manufactured and developed in Sweden by OrganoClick AB, according to ISO 14001 and ISO 9001.

OrganoTex® is developed and manufactured in Sweden by greentech company OrganoClick AB. With innovative chemistry and biodegradable fossil-free raw materials, OrganoClick mimics nature's own solutions and creates sustainable materials and products of the future with cutting-edge technical performance and functionality. OrganoClick has won numerous awards for its green innovations.
